

# Deskpro brings customer support under control

Deskpro is built for flexibility and control. It adapts to how you work, scales with your team, and runs on your terms.

Use Deskpro in the cloud or your own environment, meeting all your security and data requirements. Powerful AI features can be driven by the AI of your choice, including full support for private AI with Deskpro Private.

## The Deskpro difference

### Unified omnichannel support

Bring every channel into one unified interface with no plan based limits on the channels you can connect.

### Flexible workflow automation

Unlimited automation gives you the flexibility to build and scale even complex processes for your team.

### AI that works your way

Power Deskpro's AI features with the AI provider of your choice for smart and secure support interactions.

### Flexible deployment options

With cloud, on-prem, VPC, private and sovereign cloud options, host and use AI in secure environments.

### Support you can rely on

Our skilled in-house support team achieves a minimum monthly satisfaction score of 99% positive.

### Easy platform migration

Move from your current solution with minimal disruption in weeks. Our team make switching simple.

# Built for teams across your organization

Deskpro extends beyond support teams, giving organizations a single platform to manage requests and service delivery across departments.

## Customer support

Manage complex client relationships, SLAs, and omnichannel support with complete visibility across accounts.

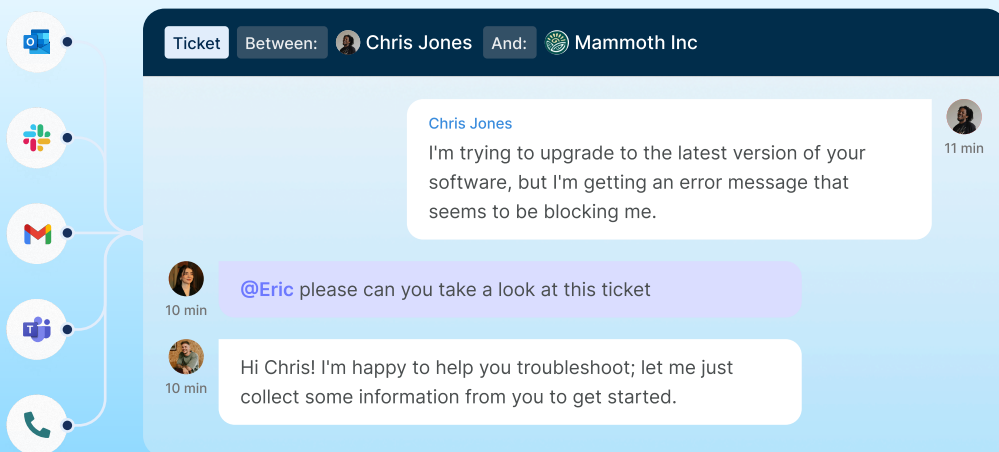

## HR & operations

Streamline internal support requests like onboarding and approvals with structured workflows and automation.

## IT help desk

Resolve issues faster with ticketing, issue tracking and integrations tailored for IT teams.

# Take control of your support operations

Deskpro helps teams deliver faster support, reduce workload, and scale without complexity.
